Network Operations Engineer

Google

Dublin, Ireland

Early

Apply

Minimum qualifications:

- Bachelor's degree in Network Engineering or Telecom Engineering, a related technical field, or equivalent practical experience.
- 2 years of experience with networking protocols and troubleshooting.
- Experience in optical or IP network operations.

Preferred qualifications:

- Experience with Unix/Linux administration.
- Experience working in network environments.
- Experience in scripting or coding for automation (e.g., Python, Go).
- Experience with network monitoring, alarming, and ticketing systems.
- Ability to grow in a high-velocity, 24/7 operational environment.
- Excellent problem-solving skills with a systematic approach to troubleshooting.

About the job

As a Network Implementation Engineer, you will be the initial point of our efforts to execute deployment, maintenance, and operations of private data networks worldwide. You will work with Technical Program Managers, Network Engineers, Design and Infrastructure Engineers, Field Engineers within Google, as well as construction and telecommunications vendors and contractors, all to position your team and organization for success.
