Remote

At Netflix, our mission is to entertain the world. Together, we are writing the next episode - pushing the boundaries of storytelling, global fandom and

making the unimaginable a reality. We are a dream team obsessed with the uncomfortable excitement of discovering what happens when you merge creativity, intuition and cutting-edge technology. Come be a part of what's next.

The Member Experience Core Systems (MECS) organization is the hub for how over 300 million members find content on Netflix, responsible for the extensive suite of Core Systems that drive personalization, search, and discovery across the entire platform, from user sign-in through to content choice.

Our work involves building foundational platforms and ML-driven recommendation engines, developing systems to support evolving content types like live events, podcasts, and advertising, and providing essential toolings for studio partners to promote content, alongside comprehensive debugging and health tools to accelerate engineering velocity.

The nature of this role is a challenging blend of operating high-scale distributed systems, implementing advanced ML-driven personalization, and collaborating closely with our Product and UI teams. We are looking for a highly capable full-stack engineer to develop tools that improve the developer experience and empower our studio partners to innovate broadly and efficiently.

Snapshot of projects you may work on:

- Collaborate with cross-functional teams to implement debugging tools for their services.
- Enhance our user interfaces to provide intuitive and seamless experiences for engineers, incorporating feedback and best practices to improve usability and adoption.
- Incorporate GenAI tools to enhance developer productivity by automating repetitive tasks.

We would love to work with you if:

- You have strong expertise with modern frontend frameworks (e.g. React/Typescript).
- You have experience with at least one backend language/framework (e.g. Java/Python/Go).
- You have experience building and consuming RESTful APIs (GraphQL is a plus).

- You proactively communicate with cross-functional (such as product and UX) teams to drive projects.
- You have a BS/MS in Computer Science, Applied Math, Engineering, or a related field.
- You have experience working with teams distributed across multiple time zones.

It would be nice if:

- You have experience with the latest GenAI stack (LLMs, RAG, Agents/Tools)
- You have experience building distributed backend systems.
- You have experience building enterprise level tools.

Generally, our compensation structure consists solely of an annual salary; we do not have bonuses. You choose each year how much of your compensation you want in salary versus stock options. To determine your personal top of market compensation, we rely on market indicators and consider your specific job family, background, skills, and experience to determine your compensation in the market range. The range for this role is \$388,000.00 - \$558,000.00. This compensation range will vary based on location.

Netflix provides comprehensive benefits including Health Plans, Mental Health support, a 401(k) Retirement Plan with employer match, Stock Option Program, Disability Programs, Health Savings and Flexible Spending Accounts, Family-forming benefits, and Life and Serious Injury Benefits. We also offer paid leave of absence programs. Full-time hourly employees accrue 35 days annually for paid time off to be used for vacation, holidays, and sick paid time off. Full-time salaried employees are immediately entitled to flexible time off. See more details about our Benefits [here](#).

Netflix is a unique culture and environment. Learn more [here](#).

[Inclusion](#) is a Netflix value and we strive to host a meaningful interview experience for all candidates. If you want an accommodation/adjustment for a disability or any other reason during the hiring process, please send a request to your recruiting partner.

We are an equal-opportunity employer and celebrate diversity, recognizing that diversity builds stronger teams. We approach diversity and inclusion seriously and thoughtfully. We do not discriminate on the basis of race, religion, color, ancestry, national origin, caste, sex, sexual orientation, gender, gender identity
